

Priyanshu Bhardwaj

Gurugram, India, 122001 | (+91) 7988208960 | priyanshubhardwaj584@gmail.com | www.linkedin.com/in/priyanshub79/

Senior Data Engineer with 4+ years of experience in building scalable cloud data platforms using Snowflake, Azure Databricks, Kafka, and Spark. Proven expertise in ETL/ELT pipelines, real-time data processing, and cloud migration with strong focus on performance optimization and reliability. Specialized in enterprise-scale Azure data platforms, real-time streaming systems, and Snowflake-based analytics solutions.

Education

Computer Science Engineering, Lovely Professional University, Jalandhar, Punjab

7.66 GPA (2018-2022)

Key Skills

- **Programming Languages:** Python, SQL, Scala
- **Big Data Technologies:** Spark, PySpark, Spark SQL, Hive
- **Cloud Computing:** Microsoft Azure (Primary), AWS (Secondary)
- **Cloud Tools and Technologies:** Databricks, Azure Data Lake, Amazon S3, GCS, AWS, ADF
- **Data Engineering Tools:** Data Modeling, ETL/ELT, Data Pipeline, Automic

Certifications

- **Snowflake Certified:** SnowPro Core Certification
- **Nagarro Certified:** Azure Data Factory Voyager, Azure Snowflake Leader
- **Udemy Certified:** Semester Program in Data Engineering and Machine Learning.

Experience

SENIOR DATA ENGINEER

APRIL 2025 – PRESENT

NAGARRO GURUGRAM

- Architected and established a scalable enterprise data platform using **Snowflake** as the central data warehouse, enabling analytics on **10+ TB of data** across **42 business units**.
- Designed and built **real-time data ingestion pipelines** using **Apache Kafka**, processing **millions of events per day** with **sub-second latency** for streaming analytics and operational dashboards.
- Implemented a **high-availability disaster recovery strategy** for **Snowflake and Kafka pipelines**, achieving **RPO = 0** and **RTO < 5 minutes** during production outages.
- Developed **CI/CD pipelines in Azure DevOps**, automating deployments across environments and reducing release time by **40%**.
- Orchestrated and monitored large-scale **ETL workflows in Azure Databricks**, implementing robust error handling, retries, and recovery mechanisms to achieve **99.9% pipeline uptime**.
- Improved Spark-based data pipelines through performance tuning and resource optimization, achieving a **25% reduction in processing time** and faster business insights.
- Led migration of legacy on-prem ETL workflows to **cloud-native Databricks and Snowflake architectures**, reducing infrastructure maintenance overhead by **50%**.
- Designed **end-to-end data architecture** including ingestion, transformation, storage, and consumption layers, following **lakehouse and medallion architecture principles**.
- Built **incremental and CDC-based pipelines** to ensure data freshness while minimizing compute costs and improving pipeline efficiency.
- Awarded **Employee of the Month** for exceptional technical contributions and project impact.

DATA ENGINEER

APRIL 2024 – APRIL 2025

DECISION TREE ANALYTICS GURUGRAM

- Designed and maintained scalable **Azure Data Factory and Azure Synapse Analytics pipelines**, implementing the **Medallion Architecture** to support enterprise analytics use cases.
- Built and streamlined large-scale **PySpark transformations and Delta tables in Azure Synapse**, reducing ETL execution and processing time by **25–30%**.
- Orchestrated end-to-end **ETL workflows in Azure Data Factory**, integrating **REST APIs** and implementing error handling, retries, and monitoring to achieve **99.9% pipeline reliability**.
- Automated build and release workflows using **CI/CD pipelines in Azure DevOps**, reducing deployment effort and release cycle time by **~40%**.
- Executed secure secret and credential management using **Azure Key Vault**, and utilized cloud resource usage to reduce **Azure infrastructure costs by ~20%**.
- Utilized **Azure Synapse Serverless and Dedicated SQL Pools**, improving query performance and optimizing resource utilization for analytical workloads.
- Expanded and migrated **SQL and Python-based Snowflake stored procedures**, implementing **RBAC, network policies, and storage integrations** to strengthen data security and governance.
- Awarded **“Employee of the Quarter”** and **“Best Debutant of the Quarter”** during my tenure.

SOFTWARE ENGINEER - DATA ENGINEERING AND ANALYTICS

APRIL 2022 – APRIL 2025

BOUNTEOUS X ACCOLITE DIGITAL GURUGRAM

- Enforced end-to-end **data integration and transformation pipelines using Azure Data Factory and Mapping Data Flows**, processing **multi-GB daily datasets** while ensuring **high data accuracy and consistency (>99%)** across analytical layers.
- Administered **Azure Data Lake Storage (ADLS)** and **Azure Blob Storage** for **10+ TB of structured and semi-structured data**, managing staging, archival, and lifecycle policies.
- Managed and optimized **Snowflake and Azure SQL Databases**, supporting **multiple analytical workloads** and improving query performance by **15–25%** through tuning and warehouse optimization.
- Leveraged advanced **Snowflake features** including **Zero-Copy Cloning, Time Travel, Sequences, Views, Materialized Views, Temporary and Permanent Tables**, enabling faster development cycles and reducing data recovery effort by **~40%**.
- Implemented **Slowly Changing Dimensions (SCD Type 1 and Type 2)** using **ADF Data Flows**, maintaining historical accuracy for **millions of business records**.
- Planned data models and created **interactive Power BI dashboards** used by **business and operations teams**, collaborating cross-functionally to deliver scalable solutions with complete technical documentation.
- **Recognized “Employee of Month” twice** during my tenure.

SOFTWARE ENGINEER INTERN - BUSINESS INTELLIGENCE

APRIL 2021 – APRIL 2022

BOUNTEOUS X ACCOLITE DIGITAL GURUGRAM

- Engineered and upheld **40+ SSIS ETL pipelines**, supporting scheduled data integration for reporting and analytics.
- Supported a **large-scale legacy SSIS environment with 700+ pipelines**, assisting in monitoring, debugging, and stability improvements.
- Migrated **100+ reports from SSRS to Power BI**, improving report interactivity and self-service analytics adoption.
- Created **Power BI dashboards and data models**, implementing basic **DAX measures and visuals** for business reporting.
- Used **Snowflake for querying, data validation, and analysis**, supporting ETL verification and reporting use cases.
- **Granted “Best Intern”** for strong technical contributions, fast learning, and consistent delivery.
