SUMMARY

Senior Data / Cloud Engineer with 10+ years of experience building and scaling large, cloud-native data platforms on Google Cloud Platform (GCP). Specialized in petabyte-scale data migration, batch data pipelines, orchestration using Cloud Composer(Apache Airflow), and BigQuery-based analytics. Strong experience in building secure,governed data movement frameworks with built-in encryption, auditability, and monitoring in banking and enterprise environments.

PROFESSIONAL EXPERIENCE

Wells Fargo - Senior Software Engineer

Nov 2021- Present

CDM Next (Cloud Data Movement Platform)

- Core engineer involved from design to production of CDM Next, an in-house, cloud-native data migration framework enabling enterprise-wide data movement to GCP
- Designed and built a configuration-driven migration platform used by application teams to migrate data from Teradata, Oracle, Hadoop/Hive, Kafka (streaming), and file-based sources
- Independently owned and delivered the Teradata → BigQuery migration workflow end-to-end, including ingestion, validation, performance tuning, and production support
- Enabled migration of 15+ PB of enterprise data to GCP, with adoption by 60+ application teams across the organization
- Developed and maintained Cloud Composer (Apache Airflow) DAGs forming the orchestration backbone for batch ingestion, retries, and failure recovery
- Integrated enterprise security and governance controls using IAM, Cloud DLP, and Secret Manager to ensure encryption, compliance, and auditability
- Implemented centralized audit logging, monitoring, and alerting using Cloud Logging and Cloud Monitoring for end-to-end pipeline visibility
- Played a key role in accelerating enterprise data center exit strategy, significantly improving migration velocity and reducing On-Prem dependency

Verizon - Member of Technical Staff -3

Oct 2019-Nov 2021

NAR - Network Analytics & Reporting

- Performed migration of Legacy ETL Workflows into Hadoop environment by establishing data pipelines and re-designing the code into PySpark/Spark-Scala and extracting better performance
- Improved the performance of the jobs by faster execution, processing more amount of information , efficient storage of data, thus generating reports faster whose insights have a direct impact on the Verizon engineering teams
- Active contributor in designing the architecture of the migration project
- Designed and implemented data ingestion pipelines to extract data from various sources and varied data types

TCS - IT Analyst

May 2015-Oct 2019

EPM - Enterprise Performance Management (TCS Internal)

- CIO initiative to enable integrated reporting from a single source across multiple trusted sources in TCS.
- Handles HR and Resource data within organization that helps business to understand how resources are being utilized across geography and provides billing and consumption information by employee bands, service lines etc.
- The metrics generated based on business logics will help organization to take quick business decisions across different operation markets.
- Developed ingestion jobs using spark to extract data from different sources and ingest into S3 as per the global dimension model.

FHS - Fault Handling System (Telenor)

- This project manages malfunctions and failures of networking elements within the network by testing, diagnosing and logging the trouble tickets. It also monitors the network and alerts in case of any breakdown

TECHNICAL SKILLS

PROGRAMMING LANGUAGES

- Python

CLOUD TECHNOLOGIES (GCP)

- BigQuery, Cloud Composer (Airflow), Google Cloud Storage (GCS),
- Dataflow, Dataproc, Cloud Run, Cloud Functions, Cloud DLP, Dataplex
- Cloud Logging, Cloud Monitoring, Cloud Scheduler

BIG DATA FRAMEWORKS

- Apache Spark (Core & SQL), Airflow (Cloud Composer)

DATABASES

- Oracle

CERTIFICATIONS

GCP Professional Data Engineer

ACHIEVEMENTS

- Awarded multiple Wells Fargo Spotlight Awards for delivering critical cloud data engineering solutions supporting enterprise data center exit and cloud modernization initiatives
- Received Verizon Spotlight Award for successfully handling multiple concurrent projects and delivering high-impact data engineering solutions.
- Acquired AWS Certified Machine Learning – Specialty with a score of 970/1000 demonstrating strong foundation in cloud-based data processing and analytics.
- Received Simple Thanks Award for Migrating Complex Workflows into Hadoop environment.

EDUCATION

DEGREE/ CERTIFICATE	INSTITUTE	CGPA/ AGGREGATE %
B.Tech. (ECE) [2011-2015]	SASTRA University , Thanjavur	7.42/10
Class -12	Delta Junior College , Hyderabad	89.6%
Class -10	Divyanjali High School , Hyderabad	92%
