SUMMARY

Big data professional and ML Enthusiast with 7+ years of experience with strong statistical analytic capabilities and ability to work with a variety of data environments. Experienced in designing and executing solutions for complex business problems involving large scale data warehousing, data storage, data modelling, ML modelling and automation of end-to-end application with integration on Cloud

PROFESSIONAL EXPERIENCE

Wells Fargo - Senior Software Engineer

Nov 2021- Present

Data Cloud & Analytics Platform

- Migrated complex workflows written in legacy code into Spark thereby reducing the dependency on the tool and saving huge on licensing costs.
- Controlled Data Movement : Built a pipeline to move bulk data from Teradata to BigQuery

Verizon - Member of Technical Staff -3

Oct 2019-Nov 2021

NAR - Network Analytics & Reporting

- Performed migration of Legacy ETL Workflows into Hadoop environment by establishing data pipelines and re-designing the code into PySpark/Spark-Scala and extracting better performance
- Improved the performance of the jobs by faster execution , processing more amount of information , efficient storage of data, thus generating reports faster whose insights have a direct impact on the Verizon engineering teams
- Active contributor in designing the architecture of the migration project
- Designed and implemented data ingestion pipelines to extract data from various sources and varied data types

TCS - IT Analyst

May 2015-Oct 2019

EPM - Enterprise Performance Management (TCS Internal)

- CIO initiative to enable integrated reporting from a single source across multiple trusted sources in TCS.
- Handles HR and Resource data within organization that helps business to understand how resources are being utilized across geography and provides billing and consumption information by employee bands, service lines etc.
- The metrics generated based on business logics will help organization to take quick business decisions across different operation markets.
- Developed ingestion jobs using spark to extract data from different sources and ingest into S3 as per the global dimension model.

FHS - Fault Handling System (Telenor)

- This project manages malfunctions and failures of networking elements within the network by testing, diagnosing and logging the trouble tickets. It also monitors the network and alerts in case of any breakdown

TECHNICAL SKILLS

PROGRAMMING LANGUAGES

- Python , Java ,Scala

BIG DATA FRAMEWORKS

- Spark (Core & SQL) , Hive , HDFS , Docker , Kubernetes

CLOUD TECHNOLOGIES

- AWS , GCP

DATABASES

- Oracle , Teradata

CERTIFICATIONS

GCP Professional Data Engineer

ACHIEVEMENTS

- Acquired AWS - Machine Learning Specialty Certificate with a score of **970/1000**.
- Received Verizon Spotlight Award for Handling **concurrent** projects.
- Received Simple Thanks for Migrating Complex Workflows into Hadoop environment.
- Received Simple Thanks for Implementing an end-to-end Machine Learning Workflow.

EDUCATION

DEGREE/ CERTIFICATE	INSTITUTE	CGPA/ AGGREGATE %
B.Tech. (ECE) [2011-2015]	SASTRA University , Thanjavur	7.42/10
Class -12	Delta Junior College , Hyderabad	89.6%
Class -10	Divyanjali High School , Hyderabad	92%

PERSONAL PROFILE

FULL NAME	Sivaraju Venkata Sai Viraaj
GENDER	Male
LANGUAGES KNOWN	English , Hindi , Telugu
HOBBIES	Mobile gaming , Watching movies
RESIDENCE	Hyderabad
